Servelec

At Servelec, we care about the future of vulnerable young people and the teams who are responsible for improving their future.

Core+, our single database solution, is specifically designed to minimise recording time, whilst providing accuracy and confidence in the data and reports.

We help you to reduce offending through early intervention. By integrating software solutions across social care, education, youth services and healthcare to share important information, we can help you save time and reduce paperwork freeing you up to do what you do best, care for others. We call this Digital Care, and we're by your side.
